Karl-Liebknecht-Straße 1, 06667 Weißenfels

Seminar „Causes of escape and economic policy“

Which situations in society cause people to escape their country?

What is going to happen in the future, if more than 1 billion people continue to starve?

What happens, if European companies 'conquer' enormous areas in African countries for the cultivation of herbal fuels and the mining of metals?

Are there information about the connection between the fossil oil consumption and the wars in the near east?

During the seminar we are going to ask us questions and try to find an answer together. The goal is, to think of new ideas, for ways out of this difficult worldwide situation that we are currently in and to deduce concrete actions from it.

Because of the limited attendance it is required, to register yourself beforehand.
